Location: Aurahi Rural Municipality, Madhesh Province ,Janakpur ,Nepal

Objective

I'm an IT student with basic hands-on cybersecurity training, and I've learned core concepts like network security and threat awareness. I'm still growing, but I'm eager to apply what I know and learn more through a real internship opportunity.

Education

Bachelor of Engineering in Information Technology (BEIT)

Nepal College of Information Technology

September 2023 - present

Skills

Programming Languages: C, C++, HTML, CSS

Version Control: Git/GitHub

Mobile Development: React Native , Flutter

Databases : PHP, Firebase

Other Tools: VS Code, N-map , Wireshark, Kali Linux, Metasploit

Soft skills: cummunication skills , Team work , Time management, Critical thinking

Projects

1. E-commerce Website

Technologies: HTML, CSS, JavaScript , PHP

Description : Built a modern full-stack e-commerce platform featuring secure authentication, product management, shopping cart, online payment integration, order tracking, and an admin dashboard. Designed a responsive user interface with scalable frontend-backend architecture to deliver a seamless shopping experience across all devices.

2. Job-Finder Mobile Application with Admin-dashboard

Technologies : React , Node.js , Flutter, Firebase

Description: Developed a modern full-stack e-commerce platform using **React, Firebase, Firestore, and Tailwind CSS**, providing customers with a seamless online shopping experience. Implemented secure Firebase Authentication, real-time database synchronization, product and inventory management, shopping cart functionality, order processing, and an intuitive admin dashboard. Integrated responsive design principles and scalable cloud-based architecture to ensure performance, security, and maintainability across desktop and mobile devices.

Key Features:

- ❖ Firebase Authentication with role-based access (Admin & Customer)
- ❖ Firestore-powered real-time product and order management
- ❖ Shopping cart, wishlist, and secure checkout workflow
- ❖ Product search, filtering, and category-based browsing
- ❖ Admin dashboard for managing products, orders, users, and inventory
- ❖ Image storage using Firebase Storage
- ❖ Responsive design with Tailwind CSS for all screen sizes
- ❖ Scalable cloud architecture with secure Firestore security rules
- ❖ Clean component-based React architecture with reusable UI components
- ❖ Fast deployment and hosting using Firebase Hosting or Vercel

Certifications
